

My name is Caleb Kupa. I recently completed my sophomore year studying Early Grades Preparation and Special Education at West Chester University. As a future educator, my goal is to inspire and influence students. I hope to teach third or fourth grade however I am open to the any opportunity to teach in the elementary classroom. I understand that every child has the potential to be a great student and feel it's the job of educators to inspire this motivation for learning. I believe I am developing this skill through my coursework and that I am well suited for this role and possess the leadership skills to be successful. Through my studies, I have become concerned about the shortcomings that exist in our country's educational system. If selected for this position, I will work to correct these wrongs and advocate for children's education. My personality, work ethic, character, and ability to work well with my peers, will contribute to an improved educational system. I look forward to this opportunity and continuing to advance my commitment to the NEA and SPSEA while bettering my education.

“Paid for by the committee to elect Caleb Kupa.”
